

“Fiber Light” Overhead Tools 2” Diameter

The Fiber Light series provides wands and extension for reaching over 30ft in height from the safety of the ground floor.

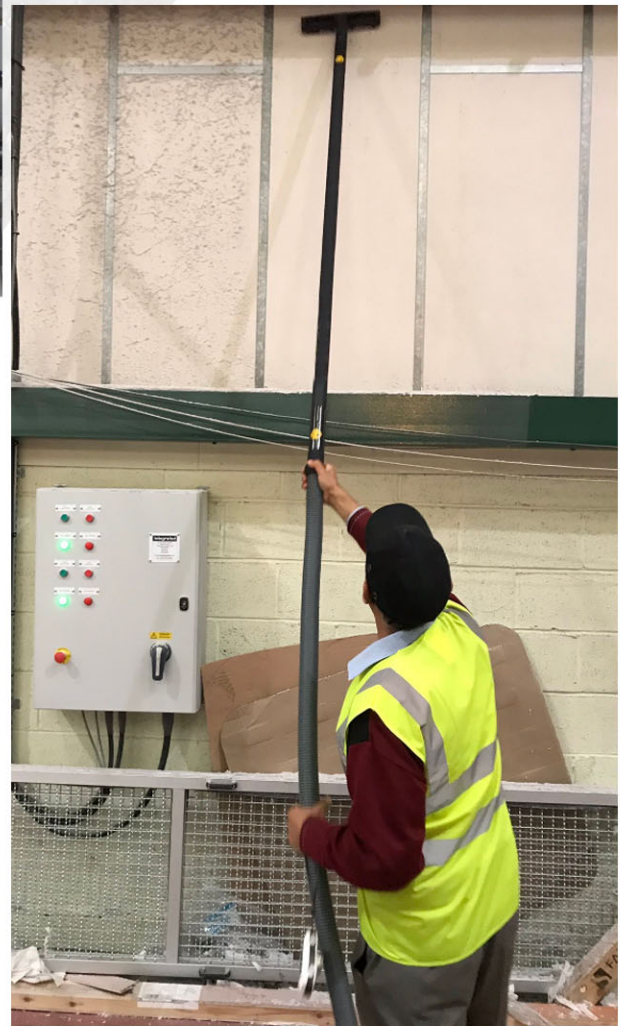

Designed to provide additional reach, features a set of up to six lightweight but durable cleaning poles plus an additional half pole to provide additional lift or horizontal reach - all featuring the unique “Safety Locking Mechanism” to keep the system securely in place during operation and preventing any part of the system from falling from height.

The system is accessories with a range of angled cleaning heads, and specialist brushes and tools to provide a flexible range of options for cleaning high-level areas such as ducting, vents, pipework and cable trays.

The systems flexible nature makes it perfect for use in industrial process where high-level dust can settle and create a safety hazard for possible dust explosion.

100% Carbon weave poles are designed for handling combustible dust and rated for explosion areas Atex 1, 2, 21 & 22
