

LEGENDS EQUIPMENT

FIBER LIGHT - CARBON FIBER TOOLS

Ultra light weight for ergonomic high-level cleaning.

For Cleaning:

- Duct work
- Rafters
- Cable Trays
- Lights
- Walls

NFPA compliant for combustible dust.

Durable Carbon Fiber construction.

“Fiber Light” Carbon Fiber Poles and Tools

The Fiber Light series provides wands and extension for reaching over 30ft + in height from the safety of the ground floor.

Designed to provide additional reach, features a set of up to six lightweight but durable cleaning poles plus an additional half pole to provide additional lift or horizontal reach - all featuring the unique “Safety Locking Mechanism” to keep the system securely in place during operation and preventing any part of the system from falling from height.

The system accessories include a range of angled cleaning heads, specialist brushes and tools to provide a flexible range of options for cleaning high-level areas such as ducting, vents, pipework and cable trays.

The systems flexible nature makes it perfect for use in industrial process where high-level dust can settle and create a safety hazard for possible dust explosion.

100% Carbon weave poles are designed for handling combustible dust and rated for explosion areas ATEX 1, 2, 21 & 22

Fiber Light by Legends Equipment

For a safe work area, Overhead ledges, Lights, ductwork and cable trays need to be clean. As dust accumulates on these hidden surfaces, the risk of second hand explosions increases.

Cleaning overhead has previously been a demanding process that involved man lifts or heavy tools to reach the upper surfaces.

Legends Equipment has used today's best carbon fiber technology to manufacture ultra light weight poles and tools to make cleaning overhead easier and less demanding.

All of our poles, heads and tools feature our unique safety locking mechanism for total operator safety; ensuring no risk of falling parts of the system during operation.

Independently certified to be compliant with NFPA standards 484, 652 and 654, ATEX 2014/34/EU.

Guaranteed Spark-Free Operation

By developing a completely conductive version of our high-level cleaning system, Certified safe for use within Division 2 certified explosive atmospheres; where combustible dust and waste builds up over time.

This technology allows for light weight floor tools as well as overhead tools.

“Fiber Light” Overhead Tools 1-1/2” Diameter

15-F-AC-7010
1-1/2” x 5’ Extension Pole

15-F-AC-7015 *
1-1/2” X 2.6’ Pole

1 each of the above * items.

Overhead Camera

- Stills: 12mp
- Records At: 1080p HD
- Battery Life: 9 hours
- Waterproof: Yes
- Waterproof Connections: Yes
- Low Light Mode: Yes
- Compatible with other devices: Yes
- Remote Access Mode: Yes

The camera package is a completely conductive, anti-static package. This allows operators in specialist environments in the Industrial and Food & Drink sectors to take advantage of the unique benefits of our camera and monitor system.

The new ATEX rated explorer features the same high-level operating specifications as its non-Atex version including 12mp camera, 1080p HD recording, remote access feature and a huge 9hr battery life.

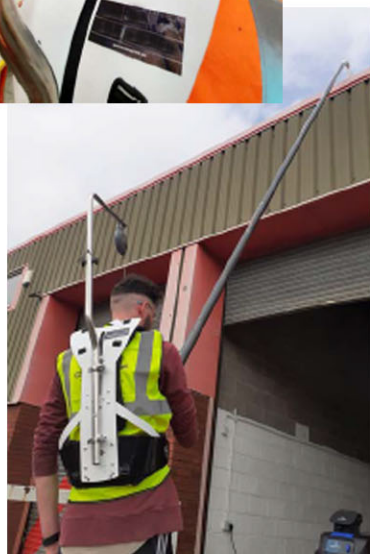

Pole Support Options

The lightweight but durable support brace, spreads the weight of the system evenly across operators shoulders and backs to make even long, heavy duty cleans much more comfortable and with less strain on the back, neck and shoulders.

The system also includes a pair of prismatic glasses to allow operators to easily monitor progress of cleans without needing to look upwards - helping to avoid operators straining their neck and making SpaceVac even more comfortable to work with.

A simple padded nylon shoulder strap is the more cost efficient option over the support brace. Capable of holding up to 100 lbs. Long service life. Suitable for most body types. Quick release buckle design allowing for wrapping or detaching from body easily.

It is recommended to use either the strap or support brace for extended periods of vacuuming.

STORAGE

Storage Locker

<https://www.youtube.com/watch?v=52o0HVby6jU>

Legends offer storage lockers to store poles, hoses, and accessories when not in use.

The locker has a snap in tool holder to keep the poles organized and easy to access.

Magnetic Strip Holder

A simple strip with snap in pipe holders to hold up to eight poles and accessories.
